

# MINERALS FOR TOMORROW

## CANADA IS AT A CROSSROADS

Our economic sovereignty depends on mineral exploration - the search for resources that power clean energy, technology, healthcare, and defence.

Without exploration, there are no mines. Without mines, there are no jobs. Without jobs, there is no economic future.

## WHY THIS MATTERS FOR CANADA

Mineral exploration:

- Supports thousands of jobs in urban, rural, and Indigenous communities across Canada
- Strengthens economic resilience, independence, and sovereignty
- Enables housing, infrastructure, electrification, and defence readiness
- Reduces reliance on foreign-controlled supply chains and provides our partners with secure materials
