

AME is the lead association for the mineral exploration and development industry based in British Columbia. Established in 1912, AME represents, advocates and promotes the interests of almost 5,000 members who are engaged in mineral exploration and development in BC and globally. AME encourages a safe, economically strong and environmentally responsible industry by providing clear initiatives, policies, events and tools to support its membership in delivering responsible projects that advance reconciliation and benefit all British Columbians.

AME Roundup 2022 is hosted on the traditional, unceded territories of the Coast Salish people, including the lands of the xʷməθkʷəyəm (Musqueam), Skwxwú7mesh (Squamish) and səílwətaʔ (Tsleil-Waututh) Nations.

Featuring:

Chief Ian Campbell | Hereditary Chief | Squamish Nation

Christine Sinclair | Professional Soccer Player | Canada

Women's National Soccer Team

Hon. Bruce Ralston | Minister of Energy, Mines and Low
Carbon Innovation

Leaders and change-makers set the stage for AME Roundup 2022 at the Opening Ceremony. Chief Ian Campbell will open the conference with a land acknowledgement, followed by remarks from industry and government leaders. Olympic gold medallist and world-leading goal scorer, Christine Sinclair, will draw parallels between playing for gold and searching for gold: persistence, resilience, grit.

EXPLORATION

This signature session summarizes mineral exploration and mining activities in British Columbia, Yukon and Alaska in 2021. This is a must-attend session for prospectors, exploration geologists, engineers, miners, financial analysts, and industry leaders seeking the first big picture year-in-review for 2021 of mineral exploration in Western Canada.

10:00 AM – Opening Remarks

10:05 AM – Mineral Exploration and Mining in British Columbia, 2021

Gordon Clarke | Director, Mineral Development Office | BC Geological Survey

10:35 AM – Yukon Geology, Exploration and Mining Overview, 2021

Scott Casselman | Head of Minerals Geology | Yukon Geological Survey

11:05 AM – Alaska's Mineral Industry in 2021

Melanie Werdon | Chief Mineral Resources Section; Geological Scientist | Alaska Division of Geological & Geophysical Surveys

NEW GEOSCIENCE

Time: 1:30 PM – 3:30 PM

Location: West Ballroom A

Session Chairs: Nathan Cleven, Natural Resources Canada; Rebecca Hunter, BC Geological Survey; Neil Wildgust, BC Geological Survey

Available online live and on-demand

Sponsored by:

The New Geoscience session showcases the results of frontline geoscience initiatives bringing forward new ideas on the regional geology of the Cordillera and their bearing on mineralization. Topics will range from regional syntheses of important metallogenes to focused studies highlighting new investigative approaches.

1:30 PM - Opening Remarks

1:50 PM – An Introduction to the Pan-Canadian Geoscience Strategy

Adrian S. Hickin | Chief Geologist and Executive Director | BC Geological Survey

1:45 PM – Upper Hazelton VMS systems: new insights from the Kitsault area

Rebecca Hunter | Senior Minerals Geologist | BC Geological Survey

2:05 PM – Early Ordovician seamounts preserved in the Canadian Cordillera.

Rosie Cobbett | Project Geologist | Yukon Geological Survey

2:25 PM – Prospectivity modelling to support critical mineral discovery

Christopher Lawley | Gold Metallogenist | Natural Resources Canada

2:45 PM – Mineral potential modeling as a strategic planning tool in British Columbia

Evan Alexander Orovan | Mineral Potential Specialist | BC Geological Survey

3:00 PM – Engage, connect and evolve the Pan-Canadian Geoscience Strategy

Dr. Sonia Talwar | Director | Geological Survey of Canada

The mineral exploration and mining industry is going through a rapid evolution in how geological and environmental data are collected and used. Increasingly, sustainability and ethical practices are playing a key role in how exploration and mining projects are undertaken, and now recognized as being directly connected to the geological and geographical characteristics of projects where geoscientists play a critical role. Developers and explorers are adapting and evolving their practices to an ever-changing landscape with Environmental, Social and Governance (ESG) at the forefront. This has led to a ripple effect throughout all development and exploration stages. How does a company factor in the economics of CO2 emission regulations on their project? How is ESG factored into the economics of exploration and development? This Theme Session “Engage. Connect. Evolve.” will showcase the way companies at the forefront are leading the way and adapting to an ever-evolving landscape.

2022 will mark the 10th year of The Gathering Place. We have come a long way in building our relationships between industry, Indigenous peoples, and government. While we have indeed made much progress, we recognize that the path of reconciliation is more a journey than a destination. This year we want to highlight those companies and communities who have taken exceptional steps along this path to work together and to prosper.

AME acknowledges and is grateful to conduct our business on the lands of the Coast Salish people, including x^wməθk^wəy^əm (Musqueam), Skwxwú7mesh (Squamish) and sə́lilwətaʔt (Tseil-Waututh) Nations.

In this panel we hear from three people with years of experience in the mining industry and working and building relationships with Indigenous communities. They learned “how to engage” on the job as the industry gradually came to understand and appreciate the value and benefit to their projects of strong, positive relationships with Indigenous people and communities.

Justin Himmelright, Carol Liao and Kevin Hannah now dedicate part of their time to teaching the next generation of mining professionals about these values and benefits, about the regulatory requirements, and about the art of building positive Indigenous relationships.

Come and listen and learn about the tools, techniques, and experiences of these dedicated educators as they work with the next generation of mining professionals to strengthen our sector's capacity and commitment to better and stronger Indigenous relationships.

ESG Financing Requirements: Opportunities and considerations for the British Columbian and Canadian mining sector

Few mining projects in British Columbia (BC) and Canada have had to conform with international ESG performance standards as it relates to financing. This landscape is changing rapidly and the mining sector will need to prepare as there are important differences between the regulatory environment and financing requirements. This luncheon presentation begins by highlighting the experiences Janis has had with numerous global and BC-based extractive projects with a focus on practical implementation needs. The second part of her presentation outlines Artemis Gold Inc.'s approach to ESG performance. As Chair of the Health, Safety, Environment and Social Performance committee with Artemis's Board of Directors, Janis will highlight opportunities and considerations for mining projects in BC and Canada.

The demand for gold and silver has kept pace with the surge during 2020. Mining and mineral exploration companies have benefitted from the surge and continue to raise substantial funds for their exploration needs. Technical expertise and effective project management are crucial to successfully finding, defining and expanding mineral resources. The Precious Metals session aims to support explorationists on their journey from discovery through to mining by: engaging industry and academic professionals; connecting people; and showcasing evolving concepts. The session will highlight a range of precious metal-rich projects in green and brown-field environments in Canada, the U.S.A. and abroad.

Despite the economic headwinds of the pandemic, base metal markets have continued to see growing interest in the long-term supply of copper, nickel and zinc. This trend is underpinned by both short-term supply shocks and dwindling reserves to meet emerging demand-side pressure arising from government-backed stimulus programs along with accelerating demand for electric vehicles and energy storage. In this session, we present new base metal exploration projects, providing valuable insights to their geological setting and discovery story.
